

PRODUCT LIST 2022

Tools and methods to support the development of Innovation Management Systems in companies

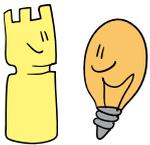

Innovation Way

A product offer
for the development of companies'
capability to innovate

Created in 2017, Innovation Way aims to revolutionise innovation consulting by bringing scientific rigour to the consulting and training activities offered by innovation agencies, consulting firms and training structures.

We are experts in developing the organizations' capability to innovate. Our products are developed in close collaboration with research laboratories specialising in Innovation Management and are in line with the ISO 56000 Series international standards.

The serious game **l'Année de l'Innovation®**

Serious Game dedicated to training and consultancy to develop companies' capability to innovate, l'Année de l'Innovation® is a game designed on basis of ISO 56002:2019 -Innovation Management System.

It takes up the challenge of offering a high-level technical content combined with a playful form. This collaborative game allows players to simulate 1 year of development of an Innovation Management System in only 1h30.

Specific game modes make it possible to best meet the needs of different player profiles (CEOs, innovation managers, students).

The PII Diagnosis - Potential Innovation Index®

An expert diagnosis combining the expertise of Research and the performance of Artificial Intelligence, the IIP Diagnosis enables the maturity of a company's Innovation Management System to be objectively assessed in just 30 minutes.

The reports generated instantaneously make it possible to visualise the maturity of the Innovation Management System, to identify areas for progress and to propose personalised recommendations for improvement.

They also make it possible to carry out benchmarks by relying on a data base of more than 500 companies.

Training courses

We are providing high-level training offer on several methods to improve the performance of an Innovation Management System. Each of our training courses is supported by Research and led by a consultant researcher. The training courses are focused on the transition to action and implement active teaching methods.

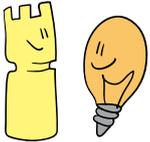

THE SERIOUS GAME

Effective training, tools and dynamism for consulting missions

L'Année de l'Innovation®

Building your own Innovation Management System

A game to learn how to develop companies' capability to innovate

It is time to take innovation seriously, to evolve your innovation practices, develop an innovation culture and, of course, to accumulate value from your innovations. These are all objectives pursued by the company's innovation managers and by the consultants appointed to support them.

But where do you start? In what order do you take action? Should you first act on the company's ability to generate ideas or on its capacity to carry out projects? Should you focus on the commitment of a core group or, on the contrary, seek to involve the whole company? Should we spend months thinking about our strategy or ensure the success of a first project, even if it is not exceptional?

There are many activities that help to develop the capacity to innovate in a company and ISO 56002 – Innovation Management System presents a fairly complete set of them. But who would want to learn about innovation by shutting themselves away in a room reading pages and pages of standards?

L'Année de l'Innovation® is a serious game developed in accordance with ISO 56002. It's the solution that allows you to train and simulate the impact of each action that you could implement or advise to improve an organisation's ability to innovate.

Designed by our team of experts in Innovation Management Systems in collaboration with innovation managers, professors in Innovation Management and international consultants, L'Année de l'Innovation® takes up the challenge of offering high-level technical content combined with a fun form.

IIP DIAGNOSIS

Assessing and supporting the development of Innovation Management Systems using the Potential Innovation Index© method

THE PII DIAGNOSIS

1 single diagnosis,
2 types of individual reports to
improve the companies' capability to innovate

The PII - Evaluation Report

- Qualification of the company's innovation dynamic (passive, reactive, pre-active, proactive)
- Visualisation of its level of maturity by activity and average obtained by practice
- Benchmarking at the practices level
- Customisation of the reports with your colours

Ideal for your prospecting activities, this format in your own colours will allow you to surprise your customers with the quality of the report and the completeness of the themes covered. It will facilitate the drafting of offers and improve the conversion rate of your prospecting actions.

The PII - Recommendations Report

- Qualification of the company's innovation dynamic (passive, reactive, pre-active, proactive)
- Visualisation of its level of maturity by activity and average obtained by practice
- Benchmarking at the practices level
- Benchmark at the activities level
- Brake and engines identification
- Personalized recommendations for lifting the brakes and strengthening the engines
- Synthesis in the form of an action plan
- Customisation of the reports generated in your colours

Exhaustive and immediate, the PII-Recommendations report is based on the research work carried out by Innovation Way and the ERPI-UL laboratory. It enables the instant generation of an operational progress plan based on the needs of the audited company and does not require any particular training to be edited and interpreted.

BUSINESS OFFER

TRAINING

Facilitate and improve innovation consultancy using research-based tools and methods

TRAINING

Facilitate and improve innovation consultancy using research-based tools and methods

Training courses

Methods favouring the development of innovation have multiplied in recent years : Creativity, Design Thinking, Lean Start-up, Open Innovation, Living Lab approaches ...

Often complementary, each of them responds to a particular need. It is therefore necessary to have a precise knowledge of them to be able to select the most appropriate method according to the needs and the particular situation of the company.

Our consultants-researchers team is composed of experts who are involved in training, carry out occasional consultancy assignments and conduct academic research programmes in line with their areas of expertise. These hybrid profiles enable us to provide high-level training that combines scientific precision.

You will also find training courses referring to the standards drafted by ISO TC 279 - Innovation Management. We assume that the guides published by this committee will be useful for the development of the «Innovation Manager» profession in organisations. Our experts have therefore been very active in this international committee since its creation.

The detailed content of our training sessions are regularly updated and may be adapted to your specific needs and constraints.

Partnerships & Open Innovation	ISO 56002 - Innovation Management System	Creativity
MBTI	Agile Method	Collaborative Labs
Monitoring	Design Thinking	Innovate through services
Lead novelty	Technological resource management	Design by use
